email	fortran.jura@mailbox.tu-dresden.de
URL	https://tu-dresden.de/gsw/jura/igetem/fsfft
Year of foundation	2009
type of organisation	university
Aim/role with respect to the transfer process	Since its founding in August 2009, the Research Center for Research Promotion and Technology Transfer has been investigating the legal framework that governs research and development as well as technology transfer at national and international level. To cover the different areas of law and their interfaces, an interdisciplinary approach is necessary, which mainly includes intellectual property law, state aid and antitrust law as well as civil and corporate law. These legal research emphases are also strongly influenced by European law and case law.
Transfer topics	With its work, the Research Center serves as a contact for scientists, research institutes, innovative companies as well as decision-makers in politics, administration and associations. Especially with activities such as publications and meetings it wants to serve for an exchange of information and opinions and to encourage discussions.
